

Laserfact ROTOCUT II

The CO₂ laser cutting head for high powers
Laser cutting with robust metal optics

- ▷ Particularly robust high-power cutting head
- ▷ Water cooled copper mirror optics
- ▷ Laser powers from 4 kW to 20 kW
- ▷ Gas pressure up to 30 bar, cutting gas nitrogen or oxygen
- ▷ Cuttable sheet thickness up to 30 mm
- ▷ Gas saving oblong nozzle aperture
- ▷ An integrated rotary axis (patent: Laserfact) can steer the autonomous nozzle (patent: Fraunhofer ILT), so that the oblong aperture is automatically directed in the cutting direction.
- ▷ Capacitive height sensor
- ▷ Industrially proven in job shops, steel companies and ship building
